

# VSP<sup>®</sup> Reconstruction

Virtual Surgical Planning

**VSP<sup>®</sup> Reconstruction** is a digital planning solution for all your maxillofacial surgical needs. Common VSP<sup>®</sup> Reconstruction applications include planning for maxilla/mandible reconstruction using the fibula free-flap, facial trauma and distraction osteogenesis.

- Simulate maxillofacial procedures on your patient's CT/CBCT.
- Optimization of surgeon defined osteotomies and bony movements prior to surgery.
- Transfer the virtual plan to surgery using patient specific host-graft osteotomy and positioning guides.
